FOR IMMEDIATE RELEASE

Re: National Engineering Month 2010: Design the Future

Engineers Canada and its members, the 12 provincial and territorial associations that regulate Canada's engineering profession, are proud to announce National Engineering Month 2010.

What: Taking place under the theme *Design the Future*, National Engineering Month 2010 is a celebration of Canadian engineering excellence that promotes engineering as a career choice to youth and reminds Canadians of the role engineering plays in their daily lives. It allows youth to use their creative skills with math, sciences and technology to see how, as engineers, they can design an amazing future for all Canadians.

Where: Activities are scheduled coast-to-coast throughout March. Event listings for each province and territory are available at:

www.nem-mng.ca/activities.cfm

For more examples of fun engineering projects for youth, visit

www.nem-mng.ca/experiments.cfm

Who: Organized by the [12 provincial and territorial regulatory bodies](#), as well as Canadian engineering students, faculties and teachers, and volunteers. The event was originally initiated by Engineers Canada.

Engineers Canada is the national organization of the 12 provincial and territorial associations that regulate the practice of engineering in Canada and license the country's more than 160,000 professional engineers.

Engineers Canada is the business name of the Canadian Council of Professional Engineers.
