

*Trevor R. Hanson, P.Eng.
APEGNB
PhD in Civil Engineering
(public transportation)
University of New Brunswick*

TD Insurance Meloche Monnex Léopold Nadeau Scholarship

The recipient of the first Engineers Canada-TD Insurance Meloche Monnex Léopold Nadeau scholarship, Trevor is studying public policy issues relating to transportation and older drivers in rural areas.

Pursuing a PhD in civil engineering, focused on transportation, at the University of New Brunswick, he is looking to improve transportation systems for his community and those in it. Trevor is researching how to deal, from a public policy perspective, with the issue of older people facing the prospect of no longer being able to drive. Policy interventions relating to older drivers have generally focused on safety in terms of licensing and retesting, and Trevor looks to find public policy interventions to ensure that older people in rural areas find ways to stay independent and retain safe access to transportation.
